Average Weekly Expenditures Per Case For Cash And Single Grant Items

June, July, August, September and October, 1936

The attached tables and charts present data on average size of case and average weekly grant per case and per person for the calendar months of June, July, August, September and October, 1936, by counties.

Prior to October all counties except Allegheny and Philadelphia were receiving commodity relief, as indicated on Table 2. During October the commodity order system was in process of being replaced by cash relief. Consequently a breakdown of average grants by type would be meaningless, and Table 2 has been omitted for October.

Effective as of the beginning of November, the entire State was on a cash relief basis, as will appear in future tabulations of this nature.

Average Weekly Expenditures Per Case for Cash Relief, By Counties,
November and December, 1936 and January, 1937

The attached table presents data on the average size of case and average weekly cash relief expenditures per case and per person for the calendar months of November and December, 1936 and January, 1937. The average weekly expenditures for January in Armstrong, Crawford and Jefferson counties have been corrected for a change in order writing day. Prior to January 23 the payment day in those counties was Tuesday, but during the week ending January 23 the payment day was changed to Saturday, necessitating the issuing of extra checks to take care of recipients' needs between Tuesday and Saturday. This change made the actual average weekly expenditure somewhat higher than the corrected figure shown in the table.

The distribution of counties according to average daily expenditures per person during January is shown on the map. The following tabulation gives the number of counties falling in each classification:

Average Weekly Expenditures Per Case for Cash Relief, By Counties,
January, February and March, 1937

The attached table presents data on the average number of persons per case and average weekly cash relief expenditures per case and person for the calendar months of January, February, and March, 1937.

The average weekly expenditures for January in Armstrong, Crawford and Jefferson counties have been corrected for a change in order writing day that necessitated the issuing of additional partial orders during the week ending January 23. This change made the actual average expenditure (see footnote to table) somewhat higher than the corrected figure shown in the table.

The distribution of counties according to average daily expenditures per person during March is shown on the map. The following tabulation gives the number of counties falling in each classification:
